Our Value Proposition

We train with implementation in mind.

Our programmes are designed to support your team's professional growth at every stage of their career and your progress along the maturity curve.

Key Features:

Action-Based Learning:

We pair learning with application

Expert Led:

We've implemented what we teach

Customised:

We use your data to apply to practice

Impact-Focused:

Designed to create tangible outcomes

Coaching Clinics:

Real-time group coaching to support live implementations

How It Works:

Assess: We assess your needs for bespoke solutions with the greatest impact

Train: Training is delivered in-person using your data and processes

Apply: Participants apply learning in real time

Support: Online clinics to address questions and coach in real time

Outcome: Tangible results, practical improvement and sustained value

Key Outcomes:

By the end of a project participants will:

- Learn while they implement a live project
- Practice learnings to ensure long-term, sustainable capability-building
- Gain confidence in applying new skillsets
- Build capabilities in areas linked to strategic priorities.

Sample Bespoke Solutions:

Targeted Skills Assessment

- We identify individual and team-level procurement skills gaps and capabilities
- You get training recommendations, tailored roadmap and an implementation plan.

Procurement Maturity Profiling

- We assess the maturity of your procurement function across processes, governance, and performance
- You get guidance and a roadmap to optimise capability, efficiency, and value delivery.

Implementation Workshop

- We provide practical, applied training and coaching on a specific issue - in real time e.g. a negotiation or commercial analysis etc.
- You get focused, practical, hands-on guidance.

Implementation Journey

- We teach the Strategic Sourcing methodology in phased steps on a live spend category
- You implement that step in real time
- We follow up each step with an online clinic to guide and coach
- You get phased, end-to-end application of the methodology, embedded learning and tangible, measurable outcomes at every stage of the methodology.
